Business IT Services

Our Experienced Team Offers Every Service You Need

A robust IT system is vital to your company's success. That's why it is crucial that you choose the best technology partner possible. Since our team of expert IT professionals has over 75 years of combined experience in the technology industry, we are familiar with every type of application, platform, and associated technologies. Whatever technology your business needs to thrive, we can find, create, fix, or enhance it. When you call on CATS, we will consult with you on your goals, then seek out and implement the ideal technology to help you accomplish those goals quickly, easily, and affordably.

CATS can provide all types of business IT services to meet your needs , including, but not limited to Data Center Design Services, Microsoft Products, Network and Technology Relocation Services, Citrix Solutions, Firewalls, Server Technology, Backup Solutions, Email Solutions, Paperless Office, Document Management, CRM, ERP, MRP, Web Portals, Intranet Design, Database Design and Management, Inventory Management, Video Conferencing and much more. Visit www.CATSTechnology.com for a complete description of all services.

A Single Point of Contact Makes It Easy on You

If you were to build a house, you could do it all yourself—hire the carpenter, the plumber, the electrician, the painter, etc.—or you could hire one person, the general contractor, tell him what you want, and let him handle it. That's how CATS operates. We serve as your single point of contact, working with vendors to obtain what you need, then putting it all together.. However, unlike a general contractor, once we build your project, we don't just hand you a key and walk away. We give your system constant, 24/7 attention with our Ultimate-Care® support and Guardian monitoring services. And when circumstances change, we can change your technology to meet your new needs.

We Have Over 75 Years of Experience

Our team of IT experts has seen it all. If there's an application out there, we've dealt with it. We're Microsoft Gold Partners, indicating a high level of expertise with all Microsoft products. We've worked with all sizes and kinds of businesses across the country. When an issue comes up, we've usually handled something similar before, so we know what to do.

We Lower Your IT Costs

When you partner with CATS, your IT costs are reduced, and they become more predictable. Our set monthly fee can be budgeted, and our proactive approach helps you plan for future IT expenditures well in advance. Also, your repair costs are minimized because our Ultimate-Care and Guardian services head off issues before they cause problems.

We Understand the Business World

We're not just technology experts. We are businesspeople too. We take the time to fully understand your business, goals, concerns, competition, challenges, and use that knowledge to craft the ideal technology solutions for you.
