

Guardian Monitoring Services

We keep your systems in top shape with constant, around-the-clock support and monitoring. We monitor desktops, servers, networks, VPN/WAN links, Websites, email—everything you count on to run your business.

Our leading edge program, Guardian, proactively notifies us of any abnormalities on your system, network or infrastructure system so that we can correct them before they impact performance. And, through a secure log in, you can view the status of your entire network at a glance, in real time, anytime you wish. View monitoring data, events, and reports without having to wait.

At our Network Operations Center, our expert team, led by your personal Lead Technician, we will continually monitor your equipment and network to keep them up and running at maximum efficiency. We use advanced software that we install on your server to check the status of a variety of indicators. If an issue arises anywhere on your system, we receive an instant email or SMS alert so we can fix it fast.

Monitoring services include Server monitoring, Performance monitoring, Network monitoring, Network security, Website monitoring, Email monitoring, Database monitoring, Application monitoring, Service monitoring, Asset tracking, Workstation monitoring, Reporting, Remote support solutions, and Regulatory compliance.

The Guardian offers many benefits to you:

Reduced System Downtime

Our IT experts stay on top of things to keep your system up and running.

Reduced IT Expenditures

Predicting and preventing system failures is the key to reducing your repair and operation costs and preventing the negative financial effects of business interruption. Let Guardian save you money and time.

System Optimization

We'll make sure that your applications run as fast and as smoothly as possible and that your system has as much horsepower as it needs, so you can get your business done without worry.

Peace of Mind

Let us worry about your IT systems so you don't have to. With Guardian watching over everything 24/7, you can finally relax.
